TREE BOG BUILDING

LIONS SHARE

THE DEEPINGS AREA OF SERVICE:

+ youth

Project description

One of our Lions members and his family are involved in setting up of a community forest garden for local children. Our Forest Garden provides an areas of natural woodland, scrub and trees which provides a atmosphere where children can learn about, nature, growing food, cooking and making items from natural things.

There wasn't a toilet facility at the site, so our Lion member decided to build a Tree Bog. Nope! We didn't know what it was either when he approached the club for some financial support to purchase required materials.

The club donated £500 and Lion Tom 'gleaned' wood, wire, nails you name it from many sources and set to building the Tree Bog himself.

We recently had the pleasure of visiting the Tree Bog (it wasn't commissioned then, so we didn't use it!) It still needed the hole cut for the seat! We had a guided tour and explanation of what happens to the waste! You don't have to hold your nose, because we were assured it doesn't smell!

TREE BOG BUILDING

LIONS SHARE

THE DEEPINGS AREA OF SERVICE:

+ youth

What went well?

All built by one dedicated Lion

The children will love it. It is going to have a plaque put up to say it was built by Lion Tom with donations from The Deepings Lions

Lessons learnt

More support to Lion Tom throughout the build

1000+ people served

100+ volunteer hours
